PC Assembly, Hardware Diagnostics, Benchmarking, Windows Troubleshooting

Languages

French: native

English: fluent

Russian, Ukrainian: basic

Guillaume Blanc

Technical Support Engineer | Support Automation

10+ years in IT support and troubleshooting. Two years running high-volume Zendesk support, combining frontline ticket work with automation: support bot, analytics scanners and AI tooling.

Experience

Sep 2024 - Present
Gamelight GmbH | Remote from Kyiv, Ukraine
Technical Support Specialist & Workflow Automation

- Built a Node.js auto-resolution bot on the Zendesk API that closed routine ticket categories end to end and replaced a paid third-party automation subscription.
- Designed "Support Desk", a support-analytics module integrated natively into the company's internal dashboard by engineering (Oct 2026).
- Developed analytics and audit scanners (JavaScript, Tampermonkey, Firebase, Zendesk API) for fraud and payment checks, trend detection and daily bug catching.
- Prototyped on-premise AI vision tooling for screenshot verification, keeping user data inside company infrastructure.
- Administered Zendesk: triggers, macros, views, SLAs, apps, API integrations and Explore reporting.
- From Aug 2026, took over the departing team lead's operational scope: coordinated two agents, managed tools and access, liaised with management, wrote incident postmortems.
- Top performer of the support team throughout.

2019 - 2022
LDLC - Topachat | Lyon, France
Computer Technician / Support Engineer

- Assembled, repaired and benchmarked custom PCs for gaming, 3D/video rendering and server workloads.
- Provided remote technical support and troubleshooting to customers through online platforms and CRM.

2014 - 2021
Tech Fix | Lyon, France
Computer Repair Technician (self-employed)

- Diagnosed and fixed hardware and software issues on home and business systems, mainly Windows.

2015 - 2018
Gendarmerie nationale | France
Gendarme

- Field intervention: first responder to emergency calls and incidents, assessing situations on site and taking fast decisions under pressure.
- De-escalation and conflict management with the public; coordination with patrol teams and emergency services.
- Procedure-driven reports; qualified as Agent de Police Judiciaire Adjoint (APJA) in 2017.

Projects

Heimdall | Real-time air-raid and drone tracking dashboard for Kyiv (Python service, web dashboard), co-built, in daily use.

FUSA | NGO supporting Ukrainian defenders. Project Lead Developer, 2022 - Present.
