Guillaume Blanc

Technical Support Engineer | Support Automation (Zendesk, API, AI tooling)

Kyiv, Ukraine (open to remote) | +33 6 60 26 25 92 | guillaume.blanc92@hotmail.fr
linkedin.com/in/guillaume-blanc-820bb528a | github.com/Dread92

Technical support engineer with 10+ years in IT support and troubleshooting, including two years running high-volume Zendesk support for a mobile-gaming platform. Combines frontline ticket work with automation: built the team's auto-resolution bot, analytics and audit scanners and AI vision tooling, while remaining the team's top performer. Native French, fluent English. Former French Gendarmerie field intervention: calm and decisive under pressure.

PROFESSIONAL EXPERIENCE

Technical Support Specialist & Workflow Automation | **Gamelight GmbH** Sep 2024 – Present
Remote from Kyiv, Ukraine | Hamburg-based startup, user acquisition through rewarded mobile games

- Built a Node.js auto-resolution bot on the Zendesk API that closed routine ticket categories end to end and replaced a paid third-party automation subscription.
- Designed "Support Desk", a support-analytics module integrated natively into the company's internal dashboard by engineering (Oct 2026).
- Developed analytics and audit scanners (JavaScript, Tampermonkey, Firebase, Zendesk API) for fraud and payment checks, trend detection and daily bug catching.
- Prototyped on-premise AI vision tooling for screenshot verification, keeping user data inside company infrastructure.
- Administered Zendesk: triggers, macros, views, SLAs, apps, API integrations and Explore reporting.
- From Aug 2026, took over the departing team lead's operational scope: coordinated two agents, managed tools and access, liaised with management, wrote incident postmortems.
- Top performer of the support team throughout.

Computer Technician / Support Engineer | **LDLC – Topachat** 2019 – 2022
Lyon, France | Leading French IT retailer

- Assembled, repaired and benchmarked custom PCs for gaming, 3D/video rendering and server workloads.
- Provided remote technical support and troubleshooting to customers through online support platforms and CRM.

Computer Repair Technician (self-employed) | **Tech Fix** 2014 – 2021
Lyon, France

- Diagnosed and fixed hardware and software issues on home and business systems, mainly Windows environments.

Gendarme | **Gendarmerie nationale** 2015 – 2018
France | National military police force

- Field intervention: first responder to emergency calls and incidents, assessing situations on site and taking fast decisions under pressure.
- De-escalation and conflict management with the public; coordination with patrol teams and emergency services; procedure-driven reports. APJA qualification (2017).

PROJECTS

Heimdall | Real-time air-raid and drone tracking dashboard for Kyiv (Python service, web dashboard), co-built, in daily use.

FUSA | NGO supporting Ukrainian defenders | Project Lead Developer, 2022 – Present.
